## Sheikh Mohammad Bin Rashid Al Maktoum's Message

---

It is in line with major economic developments taking place in the UAE and focuses on implementing best practices in all government sectors to achieve prosperity on one hand and promote the UAE's regional and international status on the other.

The UAE government strategy embodies key principles; most important of which is enhancing the level of government provided services to UAE nationals and expatriates, and in unifying efforts within a common framework that focuses on the people of this nation.

As we present this strategy, which sets the foundations for a new era of public administration, we remember the devotion with which our founding fathers built this nation and aimed to give its people a better life. This compels us to pursue those endeavors with great responsibility, continue to build on their efforts and conquer the challenges in order to promote the leading position that our country has achieved in all different areas.
